

1. BOSMAN Thermal Insulation Mineral Wool Adhesive

SIL-CHEM Sp. z o.o. / OD A DO Z S.A.

The BOSMAN Thermal Insulation Mineral Wool Adhesive is ideal for thermal insulation of walls and foundations. Reliable in fixing and gluing Multi-surface fixing: concrete, brick, EPS (white and graphite), XPS, wood, galvanised sheet metal, steel sheet with polyester coating, OSB board, or roofing felt. Ideal for: facade insulation, foundation thermal insulation, indoor and outdoor use. Resistant to extreme temperatures: Our adhesive is resistant from -5°C to +30°C, ensuring reliability in all weather conditions. It provides strong bonding: The advanced formula ensures that the insulation will be strong and stable – up to 14 m² with one tin! Fast and effective application: Thanks to our adhesive, insulation work is faster, easier and cleaner. No mess, no hassle!

2. BotaGreen Construction Board

MC-Bauchemie Sp. z o.o. / Botament

The BotaGreen construction board is a universal solution that will prove useful for many construction works indoors – from levelling walls and floors to installing bathtubs, shelves or suspended ceilings, as well as outdoors when making roof soffits or plinth areas. Made from 100% recycled XPS, it combines durability with care for the planet, reducing CO₂ emissions and supporting sustainable construction. Thanks to its 100% waterproofness and resistance to fungi and mould, the BotaGreen construction board is a reliable choice for rooms exposed to moisture.

3. Skavska Hale gable hall with anti-condensation sheet metal and trapezoidal sheet metal with anti-condensation coating

SKAVSKA HALE Sp. z o.o.

The SKAVSKA HALE gable halls with anti-condensation sheet metal and trapezoidal sheet metal with anti-condensation coating are modern structures that combine durability, functionality and aesthetics. Thanks to anti-condensation and trapezoidal sheets with anti-condensation coating, they protect stored goods and ensure optimal conditions. The gable roof increases safety and durability, and the modular design allows them to be adapted to the needs of agriculture, industry and logistics, supporting ecology.

4. FLUSH DOOR Smoke-proof Door

VITRINTEC Sp. z o.o.

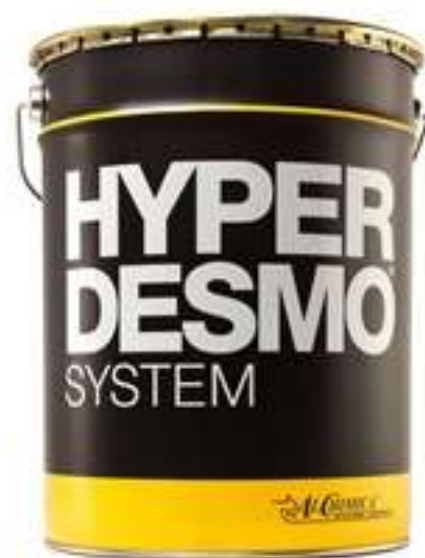

The smoke-tight FLUSH DOOR is an excellent choice for a safe and comfortable space. Thanks to the hidden frame to which 6 mm thick tempered glass is glued, the door combines aesthetics with acoustic comfort (Rw 36 dB). The aluminium frame (depth 53 mm, 55 mm, 78 mm or 100 mm) and hidden drop seals ensure tightness. Painting the profiles in any RAL colour allows for full personalisation, while the door closer and access control system increase safety of use.

5. Hyperdesmo ADY-610 – 100% aliphatic polyurethane liquid membrane for waterproofing and renovation of roof coverings, terraces and balconies

Alchimica S.A. / ALCHIMICA POLSKA Sp. z o.o.

Hyperdesmo ADY-610 is a 100% aliphatic, liquid, one-component polyurethane membrane used for waterproofing/renovation of flat roofs, terraces and balconies. It is currently the highest achievement in terms of durability and technical parameters among all waterproofing products based on polyurethane technology available on the market. Resistant to chalking and discolouration caused by UV radiation, it is ideal for projects such as renovation of worn out roofing felt/PVC, giving the structure the parameters of a cool/cold roof (SRI=102).

6. ISO-BLOCO MULTITEC

ISO-Chemie GmbH

ISO-BLOCO MULTITEC is a pre-compressed multifunctional tape with hybrid technology that complies with the MF1 standard and is used for airtight, driving rain-proof and thermally insulating 3-level sealing of windows, doors and other connection joints. The hybrid combination of flexible impregnated foam and a tight, moisture-regulating foil membrane layer enables proven and economical sealing of joints according to the principle 'tighter inside than outside'.

7. NanoPur

Instal Diament Artur Kaniewski

NanoPUR • Protects against heat loss in winter, but also against excessive heating of rooms in summer, • The parameters remain unchanged for 25 years, • Is physically neutral, does not emit any dust, odours or toxic substances • Silver nanoparticles prevent the growth of bacteria and fungi. • Seals even hard-to-reach places, • Provides excellent adhesion to virtually any surface, • Creates seamless insulation, • Is diffusion-open, which ensures air circulation in the building, • Is resistant to low and high temperatures, • Creates excellent acoustic insulation, • Does not oxidize at high temperatures. • Foam has an advantage over wool: it is impermeable to wind, has no thermal bridges, is not attractive to animals, does not burden the roof structure, and most importantly, is energy-absorbing.

8. OVOVILLE / DEVELAGRO: Self-supporting structural isosegments

GLOBARCH Sp. z o.o.

OVOVILLE / DEVELAGRO is technology that: * Is based on a double system of self-supporting structural elements made of thin-walled sheet metal profiles, enriched with a solid portion of insulating material sealed tightly between the layers. * Is supported by the next evolution of the prefabrication process, i.e. on-site prefabrication (directly on the construction site) minimising logistics processes (decarbonisation of transport).

* Practically eliminates all thermal bridges in the external partitions of the building and allows achieving a degree of thermal transmittance of the partition of $U < 0.085 \text{ W/m}^2\text{K}$ - Is environmentally friendly.

The durability of self-supporting, steel structures is measured in dozens of years of failure-free use, and their strength allows for covering objects with extensive green roof systems. * Gives more to nature than it takes away. The arched roof covered with vegetation is a biologically active surface that is over 54% larger than the area of the development taken from nature (the area of the foundation slab).

9. Reiki 125

Prana Polska Sp. z o. o. / ECOVENTEAM Sp. z o.o.

The Reiki 125 recuperator is an innovative device ensuring the highest quality of air in rooms. Thanks to proprietary patents, such as the Drive Unit and Flow Dividers, and optional photocatalytic filters, it guarantees fresh and clean air, eliminating pollution. Reiki 125 is a reliable, energy-efficient and quietest solution for your home or business.

10. SP 980 000 OTTIMO service case GRANITE, MARBLE, KITCHEN COUNTERTOPS, WINDOW SILLS, STONE TILES

Ottimo Systems Spółka z o. o. Sp.k.

The OTTIMO SYSTEMS service case is an innovative solution for repairing damage to stone products such as granite, marble, kitchen countertops, window sills and stone tiles. It allows you to retouch imperfections, cracks and scratches by combining modern fillers with practical tools. The product stands out for its functionality, durability and ecological approach, offering a competitive price and versatility of applications for installers and service technicians.

11. STARFLEX ULTRA FR

MPM srl / MAXFLOOR Sp. z o.o.

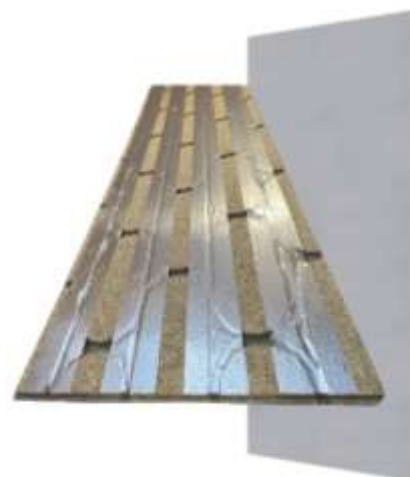

STARFLEX ULTRA FR is a liquid 1-component polyurea waterproofing membrane. The product is characterised by excellent adhesion parameters with various construction materials. It can be applied in one layer, which speeds up the completion of waterproofing works on flat roofs, balconies and terraces. At the same time, it can be applied on bituminous substrates without prior priming. One hour after application, the product is rain-resistant, which allows you to work in unfavourable weather conditions. Liquid 1-component polyurea waterproofing is the only solution of its kind in Europe. Additionally, thanks to the BROOF T4 fire certification, the product is intended for use under photovoltaic panels.

12. Floor Heating System

SUPREMA ECO SOLUTIONS Sp. z o.o.

The Suprema Heating Floor system is an innovative underfloor heating solution for frame/modular construction and wet technology. Panels made of durable P5 boards ensure quick installation and efficient heat distribution thanks to tongue and groove connections and aluminium diffusers. The system works with Basic Panel or BAUNORM Fibercement Boards, providing excellent insulation and durability, ideal for new and refurbished buildings.

13. SURMA intelligent pergola control system

SURMA SYSTEMS Sp. z o.o.

The SURMA intelligent pergola control system is an innovative solution designed specifically for the terrace pergolas we produce. It enables automatic control of the roof and all kinds of accessories: LED lighting, side blinds or heat emitters. The intuitive mobile app allows you to effortlessly create convenient scenarios or automations. We can also remotely manage pergola functions from anywhere. The solution is distinguished by its reliability, modern design and flexible configuration, which makes it ideally suited to the needs of modern users. This is a step towards the future in the field of terrace space management.

14. V Fence Fencing System

Melba Products Ltd. / MELBA SWINTEX Ltd.

V Fence panels create a 2m high fence securing the construction site in accordance with existing regulations. Perfectly visible, durable, aesthetic, safe to install and use, they demonstrate the prestige of the contractor, who at the same time gains a reusable fence, effectively securing the construction site, stored building materials and, above all, reducing to a minimum the risk of losses caused by accidents due to improper securing of the construction site.

15. ClickLine Interchangeable Tool System

KUBALA Sp. z o.o.

Click Line by Kubala is a clever system of interchangeable tools. You choose the handle that fits best in your hand. Then you select the work part for the job you are currently doing. You just CLICK and the tool is ready to work. Another task, another work piece, with just a CLICK. Cleverly and efficiently. The Click Line system is a pure saving of time, space and money. You buy the handle once, and the working parts – only when you wear them out.

16. VACUMASTER PANEL

SCHMALZ Sp. z o.o.

VacuMaster Panel is an innovative system for lifting roof and facade panels weighing up to 400 kg. Equipped with rotation (360°) and tilt (90°) functions, modular design and battery power supply, it ensures safe and efficient transfer of elements. Thanks to its ergonomics and versatility, it supports the construction industry in increasing work efficiency and safety.

17. Quantum QE Ventilation Heat Pump

QVANTUM ENERGY TECHNOLOGY Sp. z o.o.

In the face of the growing demand for innovative, efficient and compact heating systems, QVANTUM introduces the QE ventilation heat pumps to the market – devices that combine the functions of heating, cooling, ventilation and domestic hot water heating. QVANTUM QE pumps are a response to the needs of particularly modern, ecological modular and frame construction, where space, energy efficiency and functionality count.

18. ORA-160 Roof fan

UNIWERSAL Sp. z o.o.

The three-speed roof fan for operation on collective ducts in residential construction. Small dimensions, modern design, colours matching the device to the existing roof covering are the features that characterise this fan. It has an energy-saving engine with the ability to program working speeds, which effectively allows its operation to be adjusted to the required performance criterion on the ventilation grilles. Its quiet operation qualifies it for installation in multi-family buildings.

19. FOP GREENVIEW Balcony/Terrace Window

FAKRO Sp. z o.o.

The FOP balcony/terrace window is a modern solution from the FAKRO GREENVIEW line that combines functionality and design. The structure consists of two wooden windows – the upper one is tiltable (with or without an air vent) and the lower one – allowing for convenient access to the balcony and maximum lighting of the interior. Thanks to the P50 glazing unit and elegant metal cladding in three colours to choose from, FOP harmoniously integrates with the roof, emphasising the modern aesthetics of the building.
