

1. JAX 43 PREPARAT DO RĘCZNEGO MYCIA NACZYŃ

Zakłady Chemiczne EMICHEM P.P. Michał Mierzwa

JAX – A concentrated product intended for hand dishwashing. It removes food-related stains, grease and dirt, without leaving streaks or stains. It contains phosphates which reduce the adverse effects of hard water by binding calcium and magnesium ions, and prevent the deposition of insoluble salts on the dishes. It is very efficient. One drop is enough to wash the dishes. So 1 l bottle lasts a very long time. You can wash and wash and the liquid is still there :) We generate less waste, we are ECO-FRIENDLY, we are conscious consumers! The product perfectly degreases, removes the smell of food, leaving a shiny surface without stains!

2. Mop Micro Wet Duotex

Mikro System Marek Stefaniak / Mikro System Duotex

The Micro Wet Duotex is the most environmentally friendly mop. Using only water it removes more than 99% of E.coli and S.aureus bacteria. Guaranteed 700 cycles of use and washing at 95°C. The mop removes even the toughest dirt. It is characterised by high ergonomics, thanks to specially twisted loops, the mop glides easily on any surface.
