**HioPOS Solutions / DATECS-POLSKA Sp. z o.o.**

HioPOS is an Android-based cloud platform for the catering sector that can be expanded as your business grows, from a POS terminal to more advanced solutions such as self-service devices, mobile devices, ERP, CRM. HioPOS enables companies to gain a competitive advantage through a dynamic infrastructure that provides optimal performance, scalable resource management, and solid system security with backups.

### 3. Machine for extracting meat from poultry backs

#### IFEC B.V.

The back meat extracting machine has a capacity of 3,000 pieces per hour. The front halves or upper rear sections are hand loaded onto specially designed cones, equipped with a locking mechanism to ensure perfect seating. Back meat and remaining carcasses are automatically separated and unloaded. The end product is a beautiful piece of back meat, suitable for further processing. Optionally, back meat, including the shoulder bones, can be divided into 2 pieces to turn it into a snack for one-handed grilling. Like all of our machines, this machine is constructed exclusively from food grade materials such as stainless steel, food grade nylon, and features non-ventilated, washable stainless steel motors and gearboxes. The machine can be mechanically adjusted to work with chickens of different sizes. The back meat extractor is very easy to operate and maintain, and its small size makes it the perfect machine to upgrade your production.

### 4. MULTIVAC SL 300

#### MULTIVAC Sepp Haggemüller SE & Co. KG MULTIVAC Sp. z o.o.

The MULTIVAC SL 300 is an industrial automatic slicer with manual product feed. It has a divider system that allows you to easily separate individual slices of the cut product. The performance of the SL 300 slicer places it in both small and large plants. The hygienic design, especially in this operating characteristic, reduces contamination and speeds up the cleaning process of the entire machine.

## 5. Semperguard AeroTouch

### HARPS EUROPE GMBH

Semperguard aeroTouch is more than just a disposable glove; it is a future-proof solution that meets the needs of various industries while setting new standards in comfort, performance and sustainability. This product is a testament to how innovation in materials and design can lead to practical, meaningful improvements in everyday tools, making it a standout in the protective clothing market.

## 6. Kitchen island masterBLOCK

### KOMAT Mieczysław Kozłowski

The masterBLOCK kitchen island is made to the highest quality standards and ensures high aesthetic values. Monolithic tabletop with a matte Polivibre surface with polished edges. Bodies in the Hygiene H2 standard are made of a single sheet of metal without internal joints. An innovative proposal that allows not only the concentration of a large number of devices in one piece of furniture, but also their free use and arrangement depending on personalised needs.
