

## GOLD MEDAL EDUTEC 2020

### 1. Grabowski Card Games:

Multiplication table, Addition and Subtraction, Puzzle games  
**GRABOWSKI CARD GAMES Mateusz Grabowski**

Grabowski Card Games is a series of unique educational games to help children aged 5 to 10 years (and even older children) to learn counting, logical thinking, to develop math skills and more. Playing cards children practice concentration, but also learn healthy competition. The cards and games were developed by a math teacher, Andrzej Grabowski. Thanks to his experience in working with children, the Card Games are so effective and well-suited for use both at home and at school.

### 2. The League of Extraordinary Minds

**SOFT POWER Sp. z o.o.**

The League of Extraordinary Minds is an interactive, web-based platform to learn a practical approach to programming. Accessible from any computer and mobile device via a web browser, it includes courses in professional programming languages and database support, a development environment allowing to write, to compile and to test software, a system of automated assessment of user's solutions, mechanisms of work in a group, multi-stage user support and gamification.
