

Gardenia – Winners of the Gold Medal of Grupa MTP

1. Effect 24h 680 EC against weeds and moss

Certis Belchim BV Sp. z o.o.
TAMARK SA / TARGET packager

Effect 24H 680 EC is a non-selective herbicide of natural origin containing nonanoic acid. It effectively controls weeds and moss through contact action, leading to plant dehydration and rapid drying. The product works quickly, and the first effects are visible after 2-3 hours in favourable weather conditions. It is biodegradable, leaves no residue in the soil, and its use is safe for the environment, people and animals.

2. The FULVI Vocas Stimulator Line

WOKAS SA

This is the only such product on the market. WOKAS FULVI fulvic acid stimulants are 100% natural, animal-friendly, have a safe composition, and increase yield by up to 40%. They are used in the cultivation of vegetables, herbs, fruit plants, ornamental plants and lawns. These products are an organic-mineral liquid extract of peat, rich in fulvic acids that stimulate plant metabolic processes. Regular use ensures higher yields, improves plant growth and increases the content of valuable ingredients. The effectiveness of the product has been confirmed by research, which makes it innovative on the Polish market.

3. SPORT Lawn Grass Mixture

Małopolska Hodowla Roślin Sp. z o.o.

Our grass mixture is the perfect solution for intensively used recreational and sports areas. It provides durable, dense turf and excellent resistance to trampling and tearing. Due to its slow growth, it requires less mowing. As a producer of certified seeds, we guarantee the highest quality, without fillers – 100% grass seeds in the package. Excellent regenerative properties make the lawn quickly regain its aesthetic appearance.

4. Emulpar pest control agent

Przedsiębiorstwo Produkcyjno-Handlowe ADW TAMARK SA / TARGET packer

EMULPAR' 940 EC is based on a unique and innovative way of using natural vegetable oil, which is why it is fully ecological and safe, yet easy to use and effective. The effectiveness of using the product is confirmed by hundreds of satisfied customers and opinions of various recognised institutions, including the Institute of Horticulture in Skierniewice. Our cooperation with the institute and its scientists has contributed to the development of the product, which allows us to constantly improve the product formula.

5. JULECZKA Lettuce

PlantiCo - Hodowla i Nasiennictwo Ogrodnicze Zielonki Sp. z o.o.

Crisphead iceberg lettuce with light green, almost smooth leaves, with nicely incised edges. It produces large, compact, well-formed, closed heads weighing over 1000 g. It is distinguished by the late emergence of inflorescence shoots. After being cut, the head remains ripe for consumption for a long time. Recommended for year-round cultivation: early spring (in unheated tunnels) and spring, summer and autumn in the field without covers.
