

1. Acciline + – online platform for accident management in the company

FGP Polska sp. z o.o.

The acciline+ platform is an innovative online tool supporting OHS teams in the area of managing accidents at work. The platform accelerates the creation of correct documentation and enables effective accident management and planning of preventive actions. It is supplemented by substantive advice from Ayming Polska in the field of accidents at work, which will allow for savings resulting from the correct management of the accident area in the company.

2. ATLAS RUNNER

**ATLAS® Protective Footwear Sp. z o. o.
ATLAS-SCHUHFABRIK GmbH & Co. KG**

The new ATLAS RUNNER model reflects a new style in workwear: Functionality meets fashion. Thanks to the so-called uppers in the form of a sock, ATLAS Runner models offer an extremely flexible fitted form, the outer material of which consists of a comfortable and elastic knitted fabric. This 100% knitted, seamless outer material with optimal strength and performance provides a pleasant and comfortable feeling of comfort when walking.

3. DEMAR X-FLOW ESD safety shoes

Przedsiębiorstwo Wielobranżowe DEMAR Marek Dewódzki

PROTECTIVE SHOES ideal for women and men who value a fashionable style at work and are looking for extreme breathability. X-Flow is one of the most breathable safety footwear, specially designed to ensure long-term comfort in working conditions. The breathable knitted upper removes sweat to create a cooling effect. The footwear is perfect for warehouses, sales halls, distribution centres, etc.

4. JSP-GO™ multilingual packaging and retail offer

JSP – JOHNSTONE SAFETY PRODUCTS Ltd

JSP-GO™ PACKAGING THAT SPEAKS YOUR LANGUAGE – RETAIL ASSORTMENT As an international manufacturer of safety products, we appreciate the importance of delivering products in packaging that not only meets the legal requirements of the recipient country, but also effectively communicates to the end user their features and use in a language that is understandable to them. JSP's new retail range of safety products, featuring hearing, respiratory, head and eye protectors, uses an icon-based communication tool that connects to JSP-Guides Online – a multilingual platform filled with information tables and demonstration videos to ensure everything needed to stay safe.

5. Mobile manipulator for acoustic measurements

Central Institute for Labour Protection – National Research Institute (CIOP-PIB)

The mobile manipulator is used for acoustic measurements. It allows for precise placement of the microphone and the intensity probe at a specific measuring point. The mobile manipulator enables automated measurements of machine noise emission parameters both in the acoustic chamber and in industrial halls. This is the result of research work carried out at CIOP-PIB. The product will be used in the implementation of a number of basic, diagnostic and verification works.

6. Modern Stretch Line workwear

STALCO Spółka z ograniczoną odpowiedzialnością S.K.A.

The latest STRETCH LINE products are available in 2 colours – black and olive. The set includes trousers and sweatshirt for work. It is dedicated to service technicians in the industry, as well as in the automotive, assembly and service industries. Numerous pockets, refined, professional cut, air vents, quick-drying material and trousers with extendable legs. Safety and reliability will be ensured by brands such as 3M Scotchlite – numerous reflective tapes, high-quality YKK zippers that do not break or jam; places exposed to damage protected by CORDURA fabric, which effectively protects against mechanical damage and provides a hydrophobic barrier. All known, reliable brands in one – STRETCH LINE, are a guarantee of long-term use of the workwear. It will satisfy even the most demanding customers, both at work and after hours.

7. Anti-smog protective half mask

Central Institute for Labour Protection – National Research Institute

The FFP2 NR second protection class flat half mask provides the user with comprehensive protection of the respiratory system against all contaminants contained in smog. It has a filtering and absorbing layer, it fits well to the face, and thanks to the use of a fluorescent pattern, it increases the visibility of the user in dimly lit places or after dark. It is characterised by great comfort and ergonomics of use, which is confirmed by low air flow resistance.

8. Milwaukee gloves

TECHTRONIC INDUSTRIES EASTERN EUROPE Sp. z o.o.

Milwaukee cut and impact resistant gloves have thermoplastic rubber reinforcements on the back of the hand and fingers, providing excellent protection for the hand on impact. Additional reinforcement of the nitrile coating between the thumb and index finger ensures a better grip. They are easy and comfortable to use even during long-term work, ensuring a secure grip in case of contact with oily surfaces thanks to a specially finished nitrile coating. An additional advantage of the gloves is the SMARTSWIPE™ technology, which makes it possible to use touch screens without removing the gloves.

9. Q-Premium series

PPO Przedsiębiorstwo Państwowe

The PPO Q-Premium series of safety footwear is our latest product line, providing full protection while maintaining high comfort of use. All models, i.e. the Q2 sandal, the Q4 low shoe and the Q6 boot, have the S3 protection category. Q-Premium footwear is non-magnetic, metal-free and protects against ESD in accordance with the PN-EN 61340-5-1:2017-01 standard, it also has dispersing properties. Thanks to the use of modern technology, we have managed to create a sandal in the S3 protection category, which is a unique solution on the market of personal protection products.

10. Protective softshell, heated by Krystian Tech

PW KRYSTIAN Sp. z o.o.

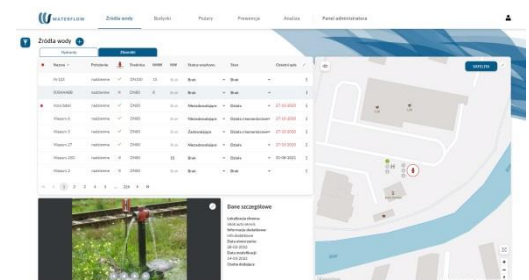

Krystian Tech protective softshell for the safety and comfort of your employees! It is an ideal solution for changing weather conditions and frequent changes of the working environment. We are slowly forgetting about thick, insulated jackets. Heated softshells can now function as two layers – when turned on, they replace the thicker insulation layer and remain a functional softshell when the panels are turned off.

11. Waterflow System

MLABS Sp. z o.o.

The Waterflow System supports the processes related to extinguishing and control activities. It is a tool that is perfect for all levels of the State Fire Service and Volunteer Fire Service. Thanks to the applied solutions, it is available not only at control positions, but also in the pocket of every officer. As a result, it has a positive effect on reducing the number of casualties, reducing losses and developing the operational capabilities of the State Fire Service units.

12. TRAUMA KIT Modular First Aid Kit (ROSZAK)

Case 6

AEDMAX.PL Sp. z o.o.

TRAUMA KIT Modular First Aid Kit (ROSZAK) Case 6 is a fully equipped, mobile version of a modular first aid kit. The construction of the set is the result of the work and experience of specialists in the field of emergency medicine. It can be used for securing mass events, sports events, organised trips and as equipment for survival trips.
